

June 22, 1950.

Dr. James M. Sherman,
Editor, Journal of Bacteriology,
Cornell University Press,
Ithaca, N.Y.

Dear Dr. Sherman:

I am sending herewith a manuscript, "The beta-D-galactosidase of *Escherichia coli*, strain K-12", for consideration for publication in the Journal of Bacteriology.

Tomorrow, I am leaving Madison to arrive at the Department of Bacteriology, University of California, Berkeley, about July 28, where I will stay until about September 5. Please address me there during the summer.

Yours sincerely,

Joshua Lederberg,
Associate Professor of Genetics.
